

## Web Design Course Notepad ++

## Using Notepad ++

- [Step One](#): Save your html add physically type in .html at the end of the file name.

- [Step Two](#): Type in your base HTML code as seen below:

```
<!DOCTYPE html>
<html>

  <body>

    <h1> Hello World </h1>

  </body>

</html>
```

- [Step Three](#): Check your file location and ensure it displays with your web browser icon:

Name	Date modified	Type	Size
 notepaddemo	2019/09/25 12:21	Chrome HTML Do...	1 KB

- [Step Four](#): Double click or open the file and you should see the following:

## Hello World

- [Step Five](#): Link your CSS document as per lesson 1.
